**Report Overview:** This publication on the Status of Women in Tipton County is part of a statewide publication of the Tennessee Economic Council on Women, *The Status of Women in Tennessee Counties, 2004*. The Economic Council on Women is a State agency created under TCA § 4-50-100, et seq. by the One Hundredth General Assembly in 1998 to address the economic needs of Tennessee women.

# The Status of Women in Tennessee Counties

## TIPTON

Women have taken remarkable strides towards economic equality, from education to earnings to political participation. Women are now pursuing goals such as business ownership, leadership roles in their careers, and election to state and federal political office. However, obstacles still exist in the climb toward equality. Nationwide, equal numbers of men and women are obtaining four-year college degrees; however, these gains have not translated into pay equity. The average college-educated woman working full time earns \$44,200 a year compared to \$61,800 for men in the same category. Women are still under-represented in many of the highest paying, fastest growing sectors of the economy. Helping women break into these traditionally male-dominated areas like computer science, engineering, mathematics and technology, as well as all skilled-labor positions, gives women tools for self-sufficiency and understanding of their personal capabilities, and these advances are good for the economy of our counties and of our state.

### Employment and Earnings

The employment and earnings index includes data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percent of women in managerial or professional occupations.

- ◇ Women in Tipton County have median earnings of \$23,559 annually, \$12,052 less than men for full-time, year-round jobs.
- ◇ The female labor force participation rate in Tipton County is about two percent less than the participation rate for women in Shelby County.
- ◇ The female unemployment rate is 4.9%, the same as the county's overall unemployment rate, and women represent 46.1% of the county's workforce.
- ◇ The percent of women in managerial or professional occupations is almost 10 percent higher than the county wide percentage.

### Economic Autonomy

The economic autonomy index includes information on educational attainment, business ownership and general quality of life issues.

- ◇ Close to 5,000 women in the county did not graduate from high school, and the current female high school dropout rate is at 7 percent. The same percentages of men and women have high school degrees in Tipton County.
- ◇ 10.0% of women in Tipton County have a four-year college degree and 10.8% of all county residents have such a degree. Both percentages are low compared to the percent of all Tennesseans with a bachelor's degree (19.6%).
- ◇ Over 2,000 women in Tipton County have no form of health insurance coverage, and almost 14 percent of women earn incomes below the poverty level.
- ◇ Though 10.3% of all families are in poverty in the county, the percentage rises to 33.2% for families with a female householder and no husband present.
- ◇ Of the almost 3,000 privately-owned businesses in Tipton County, only about 800 of them are owned by women. Though 27.0% of businesses are women-owned, 5.3% of income and receipts from private firms comes from those female-owned businesses.

# ABOUT THE COUNCIL AND THIS REPORT

Tipton County

*The Status of Women in Tennessee Counties* report offers an economic profile of women in each county of Tennessee and examines how women's rights and equality vary among the counties. The report presents data and overall rankings in two categories of women's economic status: employment and earnings and economic autonomy. Indicators of women's status in each category make up the composite rankings of the counties.

The employment and earnings section presents data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percentage of women in managerial occupations.

The economic autonomy section includes information on the percentage of businesses owned by women, educational attainment levels, percentage of households headed by a single female, single female headed households living in poverty, percentage of women with health insurance, the high school dropout rate and the teen pregnancy rate.

The **Tennessee Economic Council on Women** was created in 1998 by the Tennessee General Assembly to assess Tennessee women's economic status. The Council develops and advocates solutions to address women's needs in order to help women achieve economic autonomy. In setting its priorities, the Council selects issues that are timely and likely to result in positive changes for women.
